Sternberg, Michael J. E. *See* Barton, Geoffrey J.
Surcouf, E. *See* Cherfils, J.

Thomson, Colin, Higgins, Derek, and Edge, Colin: Theoretical studies of the electrostatic potential of some enzyme inhibitors using computer graphics techniques 147, 171
Tonge, Alan P., Chan, David A., and Murray-Rust, Peter: Model for the graphical display of pseudorotation in small rings 146, 166
Trindle, Carl: Looking at macro-molecules: hints from the artifical intelligence of vision 67

Vaney, M. C. *See* Cherfils, J.

Yadav, Janardan S. *See* Arteca, Gustavo A.

SUBJECT INDEX

Abstracts from the Seventh Annual Meeting of the Molecular Graphics Society 207
Accessible surfaces 28
Amino acids 182
Antialasing 41
Artificial intelligence, special feature on 66–92
Automatic structure comparison 190

Backtracking 74
Blind-searching 28
Bond dissociation energy 87

Cast shadows 41
Clipping 41
Color grouping file (cgf) 135
Computer modeling 112
Computer vision 67
Conformational analysis 74, 112
CPK modelng 149
Cytochromes P-450 135

Density distributions 126
Depth buffer algorithms 149
Depth cueing 41, 109
Des-iodo-thyroxine 54
DNA 126
DOCENT 67

Electrostatic potential 54, 93, 171
Enalapril 203
Enzyme inhibitors 171
Exhaustive search 74
Expert system 67, 80

4D data 54
Fourier descriptors 104
Fragmentation reaction 87
Furanose conformation 166

Heterolysis of bonds 87
Hidden line removal 54
Hidden-point-removal problem 109
Homology modeling 135
Hydrophobicity 182, 203

Immunoglobulin 190
Inductive, resonance, and polarizability effect 87
Inorganic surfaces 93
Interactive applications 149
Interactive computer graphics 13, 155
Interactive graphics databases 2
Intrasequence homology display (IHD) 135

Least-squares fitting 190
Linked list 109
Lipophilicity 203
Lipophilicity potential 182
Logic programming 80

Macromolecular flexibility 126
Macromolecules 155
Metabol-expert 80
Modeling 155
Molecular crystals 93
Molecular databases 2
Molecular graphics of hydrophobicity 203
Molecular modeling 2, 13, 161, 166, 182
Molecular similarity 45
Molecular surface 41, 104
Monte Carlo simulations 126

Nicotinic agonists 45

Partial charges 87
Partition coefficients 203
Pattern-matching 28
Polar reaction mechanism 87
Primary sequence 135
Proline conformation 166
Protein design 161
Protein structure 190
PS300 graphics program 190
Pseudorotation 166

Raster graphics 149
Reverse transcriptases 135

Saxitoxin 28
Secondary structure 135
Sequence effects 126
Shape 104
Shape groups 45

Tetrodotoxin 28
Thrashing 74
Truth maintenance systems 74
Twist-boat cyclohexane 166

Van der Waals and electrostatic potential surfaces 45
